

Spectrum Glass
For the *Home*

Distinctive Art Glass Panes

for **Cabinetry**

Home Furnishings

Interior Design

Every window is an opportunity. Privacy panels or French doors. Entry sidelights. Cabinets that could offer an inviting glimpse into what lies behind. Every window is an opportunity for architectural expression. Whether you seek the dramatic or the subtle, Spectrum's Glass for the Home offers an unparalleled designer's palette.

Spectrum brings its heritage of creating premium art glass to a new array of aesthetic textures for your home. A choice above ordinary patterned glass, these attractive sheets make a distinctive statement in your cabinetry or windows. The choices are yours: to obscure or enhance; to draw the eye with sparkling drama or surround with a soothing blanket of privacy.

For a little more than the cost of plain glass, the windows and cabinetry in your home become a subtle architectural accent.

Turn to the back panel for an explanation of our five categories of art glass texture.

Category: Privacy
Obscurity: High

Choose from five categories of art glass texture to achieve your decorating goals:

Dramatic

The Dramatic Textures speak with their own voice. Background images become secondary as the character of each glass panel takes center stage.

Impressionist

Lending intrigue and mystery to the images behind, the Impressionist Textures invite a closer look.

Transformational

Using the background as raw material, the Transformational Textures shape, bend and skew what lies behind into new and fascinating forms.

Privacy

In your personal spaces, the Privacy Textures turn the harsh reality of the world into a soothing blur.

Softening

The Softening Textures preserve the background image while adding delightful individual character.
